SCHAFBERGBAHN & HIMMELSPFORTE: *MAKING EVERY EVENT A HIGHLIGHT*

A ride on Austria's steepest cog railway takes a good 35 minutes to reach just below the 1,783-meter-high summit. Once at the top, you disembark at the Panorama Station and enjoy not only a unique view of the surrounding lakes and peaks but also interactive insights into the history and technology of the cog railway itself.

From the Panorama Station, a path leads to the Himmelspforte. The cabin almost seems to hover above the craggy, precipitous void below.

One thing is clear: up here, you're definitely quite a bit closer to the heavens above!

HIGH

YOU CAN...

CRUISING THE

As you approach Wolfgangsee from the direction of Salzburg, looking down on St. Gilgen, you are immediately greeted by the deep-blue shimmering waters of the lake. And in the midst of that magical lake: the ferries of Wolfgangsee-Schiffahrt! During the summer months, these ships crisscross between the idyllic lakeshore communities on a regular schedule. As they have done ever since 1873! But also during Advent season, on and around Christmas as well as New Year's, passengers can enjoy the winter landscapes from out on the water.

The Boat Landings

Thanks to the WolfgangseeSchiffahrt ferries, the charming locations surrounding Lake Wolfgangsee are brought within easy reach: St. Wolfgang, with its iconic „White Horse Inn“ and the SchafbergBahn cog railway; St. Gilgen, home to the birthplace of Mozart's mother; and Strobl, with its beautiful promenade.

Our seven boat landings around Wolfgangsee allow you to board and debark however you please. You determine the direction.

We are happy to advise you regarding precise departure and arrival times. Keep in mind that scheduling must take into account sailing times of our regular ferry service.
